

Product information

Today i will introduce an advantage product of our company that is the Industrial Mist Fan. About our Industrial Mist Fan is different from the market normal standard mist fan. One of our advantages is we using the float switch. What is the float switch? It can protect the motor and the atomizer when the water tank is ran out. This float switch is fill up with the user requirement which can extend the mist fan lifetime. And our water tank capacity is up to 60L, The misting fan makes mist particle in 10-20µm, the max misting efficiency is 10L per hour and the effective area is up to 300m². It is satisfied with the wide-range environment which needs humidity, cooling, disinfection, dust removing. Extremely atomization efficiency. The excellent centrifugal misting system design, no trouble of nozzle clogging, low noise. Our motor with 100% copper, IP44, B class, the best protection to support the mist fan in excellent performance all the time. Heavy duty axial fan with 8000CMH air flow, the misting can be reach over 15 meters distance.

Character Introduction

A FAMOUS MAN IN CHOSEN — ENGR. TAN

In our R&D team, Engr.Tan is the E & M Engineer. He has experience of Electrical & Mechanical more than 30years. He joined our team since 2010. He incharges the misting fans development & improvement.

He is a serious man, you can always see him in the workshop to test new product, or you can see him behind his desk with glasses and devote on the design . He is a very nice man, you can always see his smile on his face, he passes on his experience to others.

With the hard work, we succeeded to improve the performance of our mist fan. The Atomizer with high speed RPM to provide tiny mist particles in 10 µm. In open occasion, the fan blowing 9 mts with low noise, fan with 90° oscillation to make coverage area in large.

Actually there lots points not to be show. Do wanna know more details? Engr.Tan & our team are here waiting for you. Welcome to visit us.

Shipping Information

Packed by carton & wood pallet;
Strong Packing to protect the goods from any possible damage during transit.

High Working Efficiency
loading all the goods in one hour.

Here is 20 GP which full of 390 mm atomizers. It is the fifth container ship to our American customer BREEZER this quarter. We sincerely appreciate our customer's support as always.

Customer Story

Echo & Yoram

Yoram Siener who is a customer from Israel, decides to purchase aluminum impellers and centrifugal fans from CHOSEN in August. Echo is the products consultant who follows this orders.

Actually Echo knew Yoram since May 28th,2018 on alibaba. After a long discussion on WhatsApp, Yoram planed to visit the factory in July, which made Echo feel excited. As the saying goes, the road to happiness is full of hardships. Unfortunately , Yoram didn't come to China as appinted because he didn't feel well before the flight. After a month, on a Monday in August, Yoram told Echo that he would probably come to China soon. What makes Echo surprised is that Yoram arrived in Guangzhou on that Tuesday!

Then on Wednesday, they met and discuss the products from 3pm to 7pm in factory without stopping. There is something interesting that Echo will call all her customer as her "lover". It means that she will sincerely solve problems for her customers and take them as her good friends. So during the meeting, Echo not only recommend different models based on Yoram' requirement, but also show him the real performance of the products. During this three hours, Yoram feel satisfied and happy. After the meeting ,they have to say goodbye but make appintment to drink beer next time. And in the end, Yoram made order after he went back in Israel.

This is the story of Yoram and Echo! Will you be the next "lover" of Echo?

Buyers Show

"Yes we have received the Fans on Monday 11. June everything OK. Fans look very good, with impeccable workmanship and quality."

— Switzerland,
Mr.Roland odermatt

"Hi, Yes. I received wheels today. Look good. Thank you."

— Russian Federation,
Mr. Maxim Okhrimenko

"Echo, recieved goods today, i am very happy with quality of your manufacture, will recomend for future orders. Thank You"

— Australia,
Mr. James Spencer
